Technical Skills

- **Programming Languages:** C++, Python, Swift, TypeScript, Kotlin
- **Frameworks & Libraries:** SwiftUI, Combine, RxSwift, Core Data, React, Next JS, Django,
- **Tools & Platforms:** Linux/GNU, AWS, Firebase, Jenkins, Git, Xcode
- **Methodologies:** Agile, SCRUM, Test-Driven Development (TDD), CI/CD

Work Experience

iOS Software Engineer intern

Jan 2023 – Apr 2023

Openlane - San Francisco, USA

- Designed and developed watchlist feature in the Openlane app using **SwiftUI**, and **Combine**, enabled users to **track, monitor** and **bid** vehicles of their interests.
- Refactored a legacy codebase by applying **MVVM design patterns** to improve testability, scalability, and maintainability.
- Collaborated with **cross-functional** teams in **Agile** sprints to deliver high-quality features on time, ensuring seamless product releases.
- Contributed to software architecture discussions, championing **best practices** in testing and development

Software Engineer intern

May 2022 – Aug 2022

Carta - Waterloo, Canada

- Integrated the **Plaid API** into the Carta app, facilitating **ACH transfers** and enhancing electronic exercises and tender offers.
- Researched and analyzed **UI testing** strategies for the Carta application, documenting findings to enhance the team's UI testing workflow.
- Optimize CI resource sharing by engineering a **nightly UI smoke test** automation pipeline using **Fastlane** and **CircleCI**.

iOS Software Engineer intern

Aug 2021 – Dec 2021

Wonolo - San Francisco, USA

- Improved user engagement and elevated visual communication by developing **Swift-based Toast View** component for the Wonolo app, enhancing the notification system with dynamic pop-up banners.
- Coordinated with a supervisor to prioritize tasks and align development efforts, ensuring timely delivery of high-quality software and meeting **sprint goals** effectively.
- Showcased ability to write **clean, maintainable** code during rapid development cycles, contributing to successful sprint completions and delivering high-quality software consistently.

Software/Innovation Engineer Intern

Jan 2021 – Apr 2021

Canada Post - Ottawa, Canada

- Developed a **working prototype** in **Swift** for Canada Post's digital **coupon feature**, earning recognition from stakeholders for its functionality and design.
- Drove innovation by contributing to software development and exploring new **product strategies**, advancing the development of emerging technologies and enhancing the Canada Post's product portfolio.
- Researched and created a **migration roadmap** for transitioning the Canada Post app to **dark mode**, achieving a **95%** approval rating from development and UX teams, thus enhancing user experience and aligning with modern design trends.

Relevant Projects

NilePay – Waterloo, Canada

Jun 2024 –present

- NilePay is a money transfer app for South Sudanese in diaspora to support their loved one back home in South Sudan.
- Raised **\$10,000+** through pitch competitions, friends and family support.
- Achieved **300+** user signups in waitlist in just 3 months with strategic outreach.

SoulScribeAI – University of Waterloo

Sept 2023 – Apr 2024

- SoulScribeAI is a soul-searching journaling app powered by GPT-4 and LLaMA, designed to guide users through their personal journaling process. The project was part of our final year design project, I worked alongside 4 other amazing classmates to bring our vision of stress-free journalling world to life. Our project won the **Konrad Capstone Design Award** at the University of Waterloo in Winter 2024.

Education

University of Waterloo - Waterloo, Canada

Sept 2018 – Apr 2024

BASc Computer Engineering-Honors (Co-op)

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Distributed Systems, Artificial Intelligence, Mobile App Development, Software Engineering, User Experience/User Interfaces, Object-Oriented Programming, Protocol Oriented Programming.
